

GET BETTER FASTER WITH ERC

ERC requires an interdisciplinary approach among patients & clinicians

EVIDENCE-BASED

Clinical pathways and patient support materials for Colorectal surgery, Gynaecological surgery and Same Day Discharge for Hip and Knee Replacement. Caesarean Section will be the next one to be completed.

ERC MEETS THE QUADRUPLE AIM

1

BETTER OUTCOME

ERC reduces major complications after abdominal surgery by as much as 40%.

2

IMPROVED PATIENT EXPERIENCE

ERC provides written, animated and virtual patient resources to support engagement throughout the surgical journey including post discharge.

3

IMPROVED CLINICIAN EXPERIENCE

ERC helps clinicians and patients work as a coordinated team and facilitates patients' recovery. Standardized care reduces confusion and errors and facilitate care planning.

4

LOWER COST BY REDUCING COMPLICATIONS AND HOSPITAL LENGTH OF STAY (LOS)

ALBERTA 2020

The net health system savings per patient ranged from \$26.35 to \$3606.44 CAD and the Return on Investment (ROI) ranged from \$1.05 to \$7.31 after implementing Enhanced Recovery After Surgery (ERAS) multi-guidelines at multiple sites

MONTREAL 2019

Successful Same Day Discharge after Hip & Knee Arthroplasty

This document was created by the Canadian Patient Safety Institute which has now amalgamated with the Canadian Foundation for Healthcare Improvement to become Healthcare Excellence Canada. There may still be references to the former organizations as well as their logos and visual identities.
